

THORNBURG INTERNATIONAL EQUITY FUND

Fact Sheet | 31 March 2024

INVESTMENT OBJECTIVE

The Fund's goal is to provide investors with long-term capital appreciation by investing in equity and debt securities of all types.

INVESTMENT APPROACH

The Fund uses a fundamental, bottom-up investment approach to uncover promising businesses with sound fundamentals in primarily the developed international markets of Europe and the Asia Pacific region. We build a diversified portfolio with three types of stocks (basic value, consistent earners and emerging franchises) which provides the opportunity for our portfolio to produce positive risk-adjusted returns with less volatility over time.

Important Information

† Holdings are classified by country of risk as determined by MSCI and Bloomberg.

Investments carry risks, including possible loss of principal. Additional risks may be associated with investments outside the United States, especially in emerging markets, including currency fluctuations, illiquidity, volatility, and political and economic risks. Investments in small- and mid-capitalization companies may increase the risk of greater price fluctuations. Investments in the Fund are not FDIC insured, nor are they bank deposits or guaranteed by a bank or any entity.

Class I shares may not be available to all investors. Minimum investments for the I share class may be higher than those for other classes. Class R shares are limited to retirement platforms only. There is no guarantee that the Fund will meet its objectives. Portfolio attributes and holdings can and do vary. Charts may not add up to 100% due to rounding.

To determine a fund's Morningstar Rating™, funds and other managed products with at least a three-year history are ranked in their categories by their Morningstar Risk-Adjusted Return scores. The top 10% receive 5 stars; the next 22.5%, 4 stars; the middle 35%, 3 stars; the next 22.5%, 2 stars; and the bottom 10% receive 1 star. The Risk-Adjusted Return accounts for variation in a managed product's monthly excess performance (excluding sales charges), placing more emphasis on downward variations and rewarding consistent performance. Other share classes may have different performance characteristics. © 2024 Morningstar, Inc. All Rights Reserved. Beta - A measure of market-related risk. Less than one means the portfolio is less volatile than the index, while greater than one indicates more volatility than the index.

The MSCI EAFE Index (MSCI EAFE NTR) is an unmanaged index. It is a generally accepted benchmark for major overseas markets. Index weightings represent the relative capitalizations of the major overseas developed markets on a U.S. dollar adjusted basis. The index is calculated with net dividends reinvested in U.S. dollars.

The MSCI ACWI ex-U.S. Index (MSCI ACWI ex US (GR/NR)) is a market capitalization weighted index representative of the market structure of 46 developed and emerging market countries in North and South America, Europe, Africa, the Middle East, and the Pacific Rim, excluding securities of United States issuers. Beginning in January 2001, the index is calculated with net dividends reinvested in U.S. dollars. Prior data is calculated with gross dividends.

Indices do not take into account fees and expenses. Investors cannot make direct investments in an index.

Morningstar Foreign Large Blend Category is made up of foreign large-blend portfolios that invest in a variety of big international stocks. Most of these portfolios divide their assets among a dozen or more developed markets, including Japan, Britain, France, and Germany. These portfolios primarily invest in stocks that have market caps in the top 70% of each economically integrated market (such as Europe or Asia ex-Japan). The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios typically will have less than 20% of assets invested in U.S. stocks.

Basic Value: Companies generally operating in mature industries and which generally exhibit more economic sensitivity and/or higher volatility in earnings and cash flow.

Consistent Earners: Companies which generally exhibit predictable growth, profitability, cash flow and/or dividends.

Emerging Franchises: Companies with the potential to grow at an above average rate because of a product or service that is establishing a new market and/or taking share from existing participants.
