What is this product?

Type:

This is a UCITS Fund.

Term:

Open Ended Fund. The PRIIPs Manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

Objectives:

The Fund's investment objective is to seek a high level of current income. The Fund may also seek long-term capital appreciation.

The Fund principally pursues its investment goals by investing in a broad range of income-producing investments from throughout the world, comprised primarily of debt obligations, including Eligible Loans. The Fund may invest in debt obligations of any kind, quality, and maturity.

The Fund expects, under normal conditions, to select a majority of its investments from among the following debt obligations: Bonds and other debt obligations issued by domestic and foreign companies, mortgage-backed securities and other asset-backed securities convertible debt obligations, foreign governments obligations, CMOs, CDOs, CBOs, and CLOs, obligations of the U.S. government and its agencies and sponsored enterprises, structured notes, zero coupon bonds and "stripped" securities, taxable municipal obligations and participations in municipal obligations and Eligible Loans (up to 30% of net asset value ("NAV")).

The Fund may invest in any stock or other equity security which Thornburg Investment Management, Inc. (the "Investment Manager") believes may

assist the Fund in pursuing its investment goals, including common and preferred stocks issued by U.S. and non-U.S. companies of any size, and publicly traded real estate investment trusts and other equity trusts and partnership interests.

The Investment Manager seeks to identify investments that will produce income and capital appreciation. Investment decisions are based on the Investment Manager's research and analysis on domestic and international economic developments, outlooks for securities markets, interest rates and inflation, the supply and demand for debt and equity securities, and analysis of specific issuers.

The Fund may engage in transactions in Financial Derivative Instruments for both hedging and investment purposes.

The Fund is actively managed and is not constrained by any benchmark. However, the Fund uses the Bloomberg U.S. Universal Total Return Index Value Unhedged USD in the Fund's marketing materials to compare performance.

Any income less expenses realised will be accumulated and reinvested into the NAV of the Fund.

Investors can buy or sell shares on any day on which banks in Dublin are open and the New York Stock Exchange is trading.

For full investment objective and policy details, please refer to the "Investment Objective" and "Investment Policies" sections of the Fund's supplement.

Intended retail investor:

This Fund is intended for investors seeking current income and who are prepared to accept a medium level of volatility from time to time.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the Fund for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Fund compared to other products. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level and poor market conditions are very unlikely to impact the value of your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus/Supplement available at www.thornburg.com/ucits.

This Fund does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Fund depends on future market performance. Markets could develop very differently in the future.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 5 years			
Investment: USD 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum: There is no minimum guaranteed return if you exit before 5 years			
Stress	What you might get back after costs	7,270 USD	7,540 USD
	Average return each year	-27.28%	-5.49%

What happens if Waystone Management Company (IE) Limited is unable to pay out?

You may face a financial loss should the manufacturer or depository/custodian, State Street Custodial Services (Ireland) Limited, default on their obligations.

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0% annual return). For the other holding period, we have assumed the Fund performs as shown in the moderate scenario and the investment is USD 10,000.

Investment: USD 10,000	If you exit after 1 year	If you exit after 5 years
Total costs	16 USD	87 USD
Annual cost impact (*)	0.2%	0.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.2% before costs and 2.0% after costs.
