

Thornburg Strategic Income Fund (the "Fund")

A USD Accumulating (Unhedged) IE00BGPCTC11

A sub-fund of Thornburg Global Investment plc (the "Company")

The Manager of the Fund is Waystone Management Company (IE) Limited (the "Manager").

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

The Fund's investment objective is to seek a high level of current income. The Fund may also seek long-term capital appreciation.

The Fund principally pursues its investment goals by investing in a broad range of income-producing investments from throughout the world, comprised primarily of debt obligations, including Eligible Loans. The Fund may invest in debt obligations of any kind, quality, and maturity.

The Fund expects, under normal conditions, to select a majority of its investments from among the following debt obligations: Bonds and other debt obligations issued by domestic and foreign companies, mortgage-backed securities and other asset-backed securities convertible debt obligations, foreign governments obligations, CMOs, CDOs, CBOs, and CLOs, obligations of the U.S. government and its agencies and sponsored enterprises, structured notes, zero coupon bonds and "stripped" securities, taxable municipal obligations and participations in municipal obligations and Eligible Loans (up to 30% of net asset value ("NAV")).

The Fund may invest in any stock or other equity security which the Investment Manager believes may assist the Fund in pursuing its investment goals, including common and preferred stocks issued by U.S. and non-U.S. companies of any size, and publicly traded real estate investment trusts and other equity trusts and partnership interests.

The Investment Manager seeks to identify investments that will produce income and capital appreciation. Investment decisions are based on the Investment Manager's research and analysis on domestic and international economic developments, outlooks for securities markets, interest rates and inflation, the supply and demand for debt and equity securities, and analysis of specific issuers.

The Fund may engage in transactions in FDI for both hedging and investment purposes.

The Fund is actively managed and is not constrained by any benchmark. However, the Fund uses the Bloomberg U.S. Universal Total Return Index Value Unhedged USD in the Fund's marketing materials to compare performance.

Any income less expenses realised will be accumulated and reinvested into the NAV of the Fund.

Investors can buy or sell shares on any day on which banks in Dublin are open and the New York Stock Exchange is trading.

For full investment objective and policy details, please refer to the "Investment Objective" and "Investment Policies" sections of the Fund's supplement.

Recommendation: This Fund is not suitable for investors unable to maintain a long term investment.

Eligible Loans: un-securitised loans meaning liquid, transferrable, single-issuer, un-securitised investments made available in primary and secondary markets via ICMA members and which meet the definition of Money Market Instrument or otherwise constitute eligible assets for the purposes of Directive 2007/16/EC provided however that investments in un-securitised loans not meeting the definition of Money Market Instrument shall be limited to no more than 10% of a Fund's NAV (in common with other similarly categorised securities).

FDIs: a derivative contract between two or more parties whose value depends on the rise and fall of the relative value/price of an underlying asset.

Risk and Reward Profile

The Fund is in category 3 as the assets it holds have historically been subject to moderate levels of price fluctuation. The category shown is not guaranteed and may change over time. It is based partially on historical data of a similar fund of the Investment Manager, and may not be a reliable indication of future circumstances. The lowest category does not mean a risk free investment.

The Fund is exposed to additional risks not captured by the risk indicator including, without limitation:

Issuer Risk: an issuer of a security purchased by a fund may perform poorly and, therefore, the value of its stocks and bonds may decline and the issuer may default on its obligations. Poor performance may be caused by poor management decisions, competitive pressures, breakthroughs in technology, reliance on suppliers, labor problems or shortages, corporate restructurings, fraudulent disclosures, or other factors.

Re-Investment of Collateral Risk: where collateral is re-invested, the Fund is exposed to additional risks and the Fund's overall risk will be leveraged.

Liquidity Risk: the Fund may have difficulty buying or selling certain securities readily which may have a financial impact on the Fund.

Mortgage & Asset Backed Securities Risk: impairment of the value of underlying assets of a mortgage-backed security, such as failure to pay a loan, may result in a reduction in the value of the security.

Debt Securities & Obligations Risk: Debt Securities and government obligations are affected by changes in interest rates, and credit quality. The value of securities may fluctuate in response to changing economic conditions or the perceived creditworthiness of an issuer. When interest rates rise, bond prices may fall because investors may be able to obtain a more attractive rate of interest elsewhere. The Fund will be more sensitive to interest rates depending on the average maturity or average duration of its bond investments.

FDI and Leverage Risk: in addition to Counterparty Risk, FDI may fluctuate in value rapidly and leverage embedded in FDI may cause losses that are greater than the original amount paid for the relevant FDI.

Credit/Counterparty Risk: a party with whom the Fund contracts for securities or to safekeep the Fund's assets may fail to meet its obligations (e.g. fail to pay principal or interest or to settle an FDI) or become bankrupt, which may expose the Fund to a financial loss.

Currency Risk: changes in exchange rates may reduce or increase the value of non-U.S. Dollar denominated assets held by the Fund. Currency hedging may not be successful in mitigating such effects.

Operational Risk: human error, system and/or process failures, inadequate procedures or controls may cause losses to the Fund.

These risk factors are not exhaustive. Please review the "Risk Factors" sections in the prospectus and supplement.

Charges for this Share Class

One-off charges before or after you invest

Entry Charge	5.00%
