## What is this product?

### Type:

This is a UCITS Fund.

### Term:

Open Ended Fund. The PRIIPs Manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

### Objectives:

The Fund's primary objective is to provide as high of a level of current income as possible while at the same time seeking to preserve capital.

The Fund seeks to achieve its objective through investing (under normal market conditions) at least 65% of its NAV in (i) obligations of the U.S. government, its agencies and instrumentalities and (ii) A or Above Debt Securities.

The Fund may also invest up to 35% of its NAV in BBB or Baa Debt Securities if such instruments are consistent with the Fund's objective.

The Fund typically expects to maintain an average maturity of less than 5 years.

The Investment Manager seeks to identify a portfolio of investments based on analysis of the fundamental creditworthiness of the issuer, the value of the security based on credit analysis comparisons to market price, and to

ensure portfolio diversification.

FDI are utilised for the purposes of hedging currency risk and investment purposes. The Fund may invest up to 10% of its NAV in other funds with similar investment policies.

The Fund is actively managed and is not constrained by any benchmark. However, the Fund uses the Bloomberg Intermediate US Govt/Credit TR Index Value Unhedged USD in the Fund's marketing materials to compare performance.

Any income less expenses earned will be distributed in accordance with the distribution policy in the prospectus.

Investors can buy or sell shares on any day on which banks in Dublin are open and the New York Stock Exchange is trading.

The Fund promotes sustainability characteristics according to Article 8 of the EU criteria for environmentally sustainable economic activities.

For full investment objective and policy details, please refer to the "Investment Objective" and "Investment Policies" sections of the Fund's supplement.

### Intended retail investor:

This Fund is intended for investors seeking capital growth over a long-term horizon, with some current income, and who are prepared to accept a medium level of volatility from time to time.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the Fund for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Fund compared to other products. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level and poor market conditions are very unlikely to impact the value of your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus/Supplement available at [www.thornburg.com/ucits](https://www.thornburg.com/ucits).

This Fund does not include any protection from future market performance so you could lose some or all of your investment.

## Performance scenarios

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Fund depends on future market performance. Markets could develop very differently in the future.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years.

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

## What are the costs?

The person advising on or selling you this Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0% annual return). For the other holding period, we have assumed the Fund performs as shown in the moderate scenario and the investment is AUD 10,000.

Investment: AUD 10,000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	295 AUD	1,462 AUD
<b>Annual cost impact (*)</b>	3.0%	3.0%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.1% before costs and 1.1% after costs.
