This report also describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the past year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class R4	\$104.00	0.99%

How did the Fund perform last year and what affected its performance?

The Fund's Class R4 shares outperformed the Bloomberg Intermediate U.S. Government/Credit Total Return Index Value Unhedged (the "Index") during the 12-month period ended September 30, 2024.

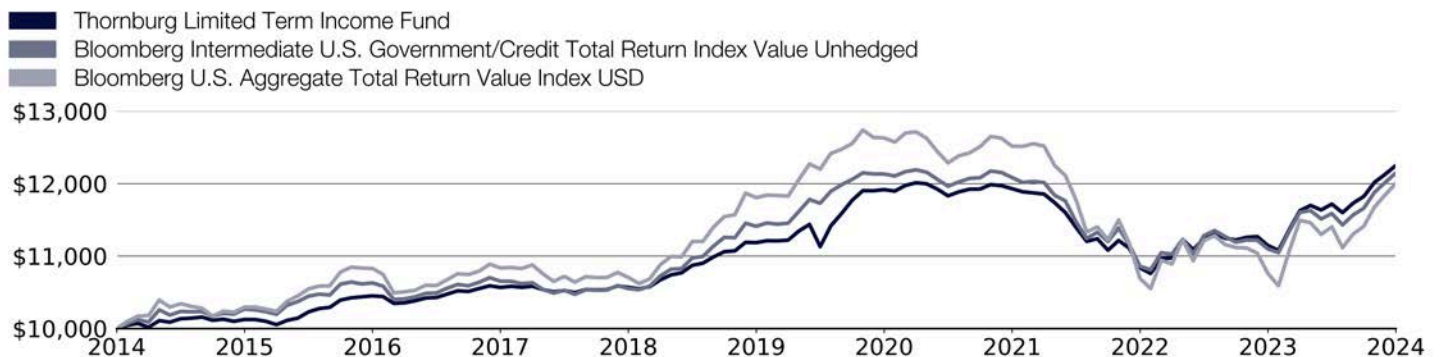

Treasury yields fell meaningfully over the 12-month period ended September 30, 2024, as U.S. inflation continued to improve, and the market priced in anticipated interest rate cuts by the Federal Reserve.

The Fund's slight short duration versus the Index was a relative detractor in this environment. However, this was offset by positive relative returns from the Fund's allocation to collateralized mortgage obligations, corporate bonds, and asset-backed securities

How did the Fund perform over the past 10 years?

The line graph below reflects a hypothetical \$10,000 investment. The returns shown in the line graph and table assume the reinvestment of dividends and capital gains, but do not reflect the deduction of taxes that a shareholder would pay on distributions or the redemption of Fund shares. The performance information shown below represents past performance and is no guarantee of future results. For Fund performance current to the most recent month end, visit <https://www.thornburg.com/product/mutual-funds/fli/THRIX> or call 1-800-847-0200. Performance for other share classes of the Fund will vary.

Cumulative Performance

Effective September 30, 2024, the Fund adopted the Bloomberg U.S. Aggregate Total Return Index Value USD as its broad-based securities market index that represents the overall applicable market in which the Fund invests, and the Bloomberg U.S. Government/Credit Intermediate Total Return Index Value Unhedged as an additional index that represents the market sectors which the Fund's advisor believes are more representative of the Fund's investment universe.
