This report also describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the past year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class A	\$52.00	0.50%

How did the Fund perform last year and what affected its performance?

The Fund's Class A shares outperformed the ICE BofA U.S. Treasury Bill Index (the "Index") during the 12-month period ended September 30, 2024.

Treasury yields fell meaningfully over the 12-month period as U.S. inflation continued to improve, and the market priced in anticipated interest rate cuts by the Federal Reserve.

The Fund's relatively longer duration versus the Index proved to be a positive contributor to relative performance. Additionally, the Fund's allocation to asset-backed securities and investment-grade corporate bonds was beneficial. There were no material detractors to the Fund's performance over the period.

How did the Fund perform over the past 10 years?

The line graph below reflects a hypothetical \$10,000 investment and assumes the deduction of the maximum sales charge associated with that investment. The returns shown in the line graph and table assume the reinvestment of dividends and capital gains, but do not reflect the deduction of taxes that a shareholder would pay on distributions or the redemption of Fund shares. The performance information shown below represents past performance and is no guarantee of future results.
