This report also describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the past year?

(based on a hypothetical \$10,000 investment)

| Class Name | Costs of a \$10,000 investment | Costs paid as a percentage of a \$10,000 investment |
|------------|--------------------------------|--|
| Class A | \$160.00 | 1.42% |

How did the Fund perform last year and what affected its performance?

The Fund's Class A shares underperformed the Russell 2500 Growth Index - Total Return (the "Index") during the 12-month period ended September 30, 2024.

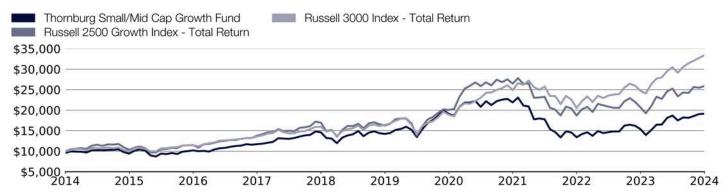

The Fund's stock selection in the information technology and energy sectors had a positive impact on performance relative to the Index during the period. Stock selection in and underweight allocations to health care and consumer discretionary stocks detracted from relative results.

Returns of mid-cap companies outpaced small-cap companies within the Index during the period. Stock selection was the primary detractor from performance within the mid-cap (those ranging from approximately \$2.5 - \$12 billion market capitalization) portion of the Fund's portfolio. However, an underweight positioning in the Fund to smaller stocks (those under approximately \$2.5 billion market capitalization) and an overweight positioning to larger stocks (those over approximately \$12 billion market capitalization) within the Index's universe had positive impacts on the Fund's performance relative to the Index.

How did the Fund perform over the past 10 years?

The line graph below reflects a hypothetical \$10,000 investment and assumes the deduction of the maximum sales charge associated with that investment. The returns shown in the line graph and table assume the reinvestment of dividends and capital gains, but do not reflect the deduction of taxes that a shareholder would pay on distributions or the redemption of Fund shares. The performance information shown below represents past performance and is no guarantee of future results. Performance for other share classes of the Fund will vary.

Cumulative Performance

Effective September 30, 2024, the Fund adopted the Russell 3000 Index – Total Return as its broad-based securities market index that represents the overall applicable market in which the Fund invests, and the Russell 2500 Index—Total Return as an additional index that represents the market sectors which the Fund's advisor believes are more representative of the Fund's investment universe.
