## What were the Fund costs for the past year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class R6	\$52.00	0.49%

Fund costs may be higher for a full one year period.

## How did the Fund perform last year and what affected its performance?

The Fund's Class R6 shares outperformed the Bloomberg U.S. Aggregate Total Return Index Value USD (the "Index") during the period from the Fund's inception on October 2, 2023 to September 30, 2024.

Treasury yields fell meaningfully over the 12-month period ended September 30, 2024, as U.S. inflation continued to improve, and the market priced in anticipated interest rate cuts by the Federal Reserve.

Security selection in corporate bonds, and to a lesser extent asset-backed securities, proved to be beneficial to the Fund's relative performance. This was partially offset by performance from the Fund's positioning along the U.S. Treasury yield curve. In particular, the Fund's overweight to the 10-year part of the curve and underweight to the shorter part of the curve was a detractor to the Fund's relative performance because longer-maturity securities tended to underperform shorter maturity securities during the period.

## How did the Fund perform over the past 10 years?

The line graph below reflects a hypothetical \$10,000 investment. The returns shown in the line graph and table assume the reinvestment of dividends and capital gains, but do not reflect the deduction of taxes that a shareholder would pay on distributions or the redemption of Fund shares. The performance information shown below represents past performance and is no guarantee of future results.
