What were the Fund costs for the past six months?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class C	\$64.00	1.28%

How did the Fund perform for the past six months and what affected its performance?

The Fund's Class C shares outperformed the ICE BofA U.S. Municipal Securities Index (the "Index") during the 6-month period ended March 31, 2025.

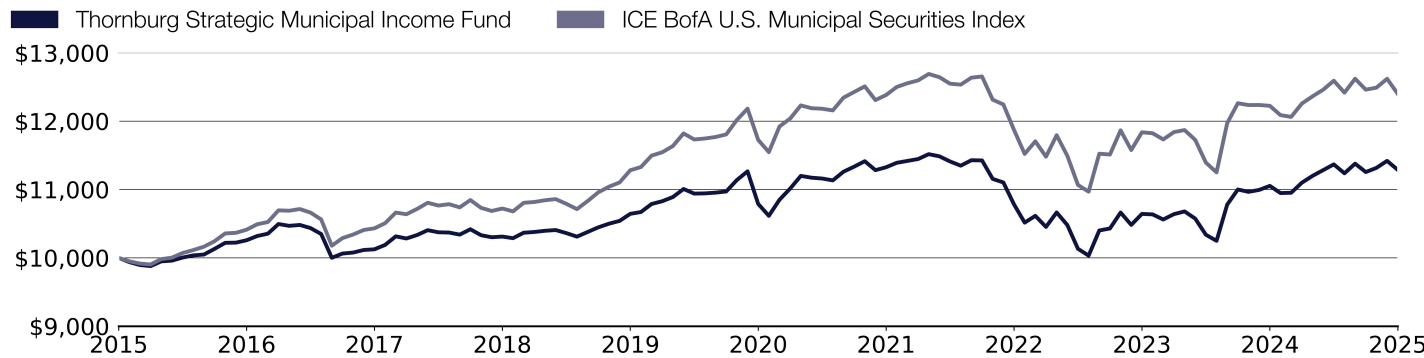

While underlying municipal credit remained strong, increased uncertainty around federal policy and higher market volatility acted as significant headwinds to Fund performance. Municipal market yields diverged as the Federal Reserve shifted policy during the period, which led to short-term yields experiencing modest declines while long-term yields notably increased.

Despite the challenges, bond selection within the Fund was the largest positive contributor to performance relative to the Index during the period.

How did the Fund perform over the past 10 years?

The line graph below reflects a hypothetical \$10,000 investment. The returns shown in the line graph and table assume the reinvestment of dividends and capital gains, but do not reflect the deduction of taxes that a shareholder would pay on distributions or the redemption of Fund shares. The performance information shown below represents past performance and is no guarantee of future results.
