What were the Fund costs for the past six months?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class A	\$49.00	0.99%

How did the Fund perform for the past six months and what affected its performance?

The Fund's Class A shares outperformed the ICE BofA U.S. Municipal Securities Index (the "Index") during the 6-month period ended March 31, 2025.

Municipal market yields diverged as the Federal Reserve shifted policy, which led to short-term yields experiencing modest declines while long-term yields notably increased. Underlying municipal credit remained strong; increased uncertainty around federal policy and higher market volatility were significant headwinds to Fund performance.

The Fund's shorter duration and yield curve positioning were the largest contributors to performance relative to the Index during the period. As a result of the volatility and the Fund's focus on New York bonds, security selection and sector/quality returns were the largest detractors of relative performance.

How did the Fund perform over the past 10 years?

The line graph below reflects a hypothetical \$10,000 investment and assumes the deduction of the maximum sales charge associated with that investment. The returns shown in the line graph and table assume the reinvestment of dividends and capital gains, but do not reflect the deduction of taxes that a shareholder would pay on distributions or the redemption of Fund shares. The performance information shown below represents past performance and is no guarantee of future results.
